I talked with John Blake, SITLA, about the 3 annual reports for 1995 for this operation. He thought the three different permit numbers mentioned in the reports were for three different material permits, i.e. three different sand & gravel permits where materials had been removed. These sand & gravel permits are separate from the mineral lease SITLA has for clay (ML46149) - which is what we reference in our permit. The Daggett County folks probably filled out our reports with what they thought we needed.
